Staff Report

To: Service Authority for Freeway and Expressways
From: Veronica Lezama, Transportation Planner
Date: August 18, 2016
Subject: San Benito County Motorist Aid System

Recommendation:

RECEIVE Update on the San Benito County Emergency Call Box Program.

Summary:

At the July 21, 2016 meeting, the Service Authority for Freeways and Expressways (SAFE) Board of Directors received a presentation on the Emergency Call Box Program. The Board requested more information on the typical calls received and number of call received by location.

Financial Considerations:

The Service Authority for Freeways and Expressways (SAFE) receives approximately $56,000 annually in vehicle registration fees to maintain emergency call boxes in San Benito County. A $1 per registered vehicle fee is collected by the Department of Motor Vehicles for this program.

Background:

In 1998, the Council of San Benito County Governments established the San Benito County Service Authority for Freeways and Expressways (SAFE). SAFE was tasked with developing a Motorist Air System in San Benito County. The program is a cooperative effort between California Department of Transportation, California Highway Patrol, and the San Benito County Service Authority for Freeways and Expressways. In some communities the Motorist Air System consists of an Emergency Call Box Program, Freeway Service Patrol, and/or additional California Highway Patrol enforcement. In San Benito County, the Motorist Aid System consist of an Emergency Call Box Program.

At the July SAFE meeting, staff provide the Board with a presentation on San Benito County’s Emergency Call Box Program’s background, purpose, usage and funding (Attachment 1). The Board of Directors also inquired on the typical calls received and number of call received by location. A response to the Board’s inquiry is summarized in the Staff Analysis section of this staff report.
Staff Analysis:

At the July 21, 2016 meeting, the Service Authority for Freeways and Expressways (SAFE) Board of Directors inquired about the following items associated with San Benito County Emergency’s Call Box Program.

1. **Type of Emergency calls Received on San Benito County Call Boxes.**

   The Monterey County CHP Dispatch Center reported that their phone system received approximately 366 calls on San Benito County call boxes between July 1, 2015 and July 30, 2016.

   The CHP Dispatch Manager reported that the typical calls received on San Benito call boxes include the following:
   - Disabled motorists
   - Fire reports, including car fires
   - Pedestrian incidents
   - Traffic collisions
   - Property damage and injury
   - Request for ambulance
   - Hazards
   - Caltrans worker with no cell reception requesting officer for assistance with traffic control.
   - Routine test maintenance calls

   The majority of calls, approximately 41 percent were routine test maintenance calls or callers on the line that hung up and CHP was unable to re-contact. Secondly, approximately 35 percent of the calls were for disabled motorists requesting assistance. Of the total calls received on San Benito call boxes, approximately 70 percent required CHP officer response.

   This fall, the Monterey County CHP Dispatch Center will be launching the VESTA call handling system which will allow for greater output of data for future call box reports.

---

1 101 of the call received were routine maintenance calls conducted by the SAFE contractor to ensure program functionality.
2. **Number of calls received by highway.** As noted in the tables below, Highway 156 received the most call box user calls followed by Highway 25.
